PROFESSIONAL SUMMARY

Performance-driven Software Engineer specializing in full-stack architecture, clean system design, and high-efficiency web automation. Technical expert in building decoupled web infrastructure using Django, Flask, and modern JavaScript ecosystems while managing persistent database layers via PostgreSQL and MySQL. Highly skilled in codebase refactoring, implementing automated end-to-end processing pipelines, and maintaining rigorous version control and cloud deployment environments.

TECHNICAL SKILLS MATRIX

Languages	Python, JavaScript, TypeScript, SQL (PostgreSQL, MySQL), HTML5, CSS3
Front-End	React, Next.js, TailwindCSS, Bootstrap, UI/UX Core Principles
Back-End & DB	Django, Flask, RESTful APIs, HTTP protocols, PostgreSQL, MySQL, Node, Express, MongoDB
Tools & Devops	Playwright, Git, Version Control, Cloud Deployment (Render), Systems Design

PROFESSIONAL EXPERIENCE

Semester Integrated Technologies — *Junior Software Engineer Intern* *Abuja, Nigeria | May 2026 – Present*

- Collaborate with engineering teams to architect and build high-end, production-ready web layouts using React, Next.js, and TailwindCSS.
- Design and optimize back-end components using Python (Django/Flask) to handle asynchronous operations and secure corporate API routes.
- Refactor data workflows and optimize relational databases using PostgreSQL/MySQL, reducing query execution and retrieval times.
- Manage end-to-end version control workflows utilizing Git/GitHub, resolving integration conflicts and maintaining repository hygiene.
- Oversee application deployments and environment updates on cloud hosting environments including Render, analyzing logs to resolve critical bugs.

KEY TECHNICAL PROJECTS

Emko Secured Limited — *Enterprise Security Platform* *Django, Postgresql, Bootstrap*

- **Engineered** a high-end corporate web platform for Nigeria's premier defense and security technology partner, featuring structured RFQ workflows and compliance showcases.
- **Optimized** responsive front-end components and dynamic product catalogs to deliver a secure, professional digital footprint for enterprise clients.

Semester Technologies — *Core web platform* *React, Bootstrap*

- **Collaborated** on the engineering team to build Semester Technologies' core web platform, focusing on clean, responsive front-end interfaces.
- **Delivered** dynamic service grids and seamless onboarding experiences for both incoming tech students and enterprise clients.

EDUCATION & CREDENTIALS

EDUCATION & CONTINUOUS LEARNING

Self-Directed Software Engineering Curriculum	Remote
Full-Stack Web Development & Software Architecture	2024 – Present
CPN NSQ	2024
